RÖHNISCH

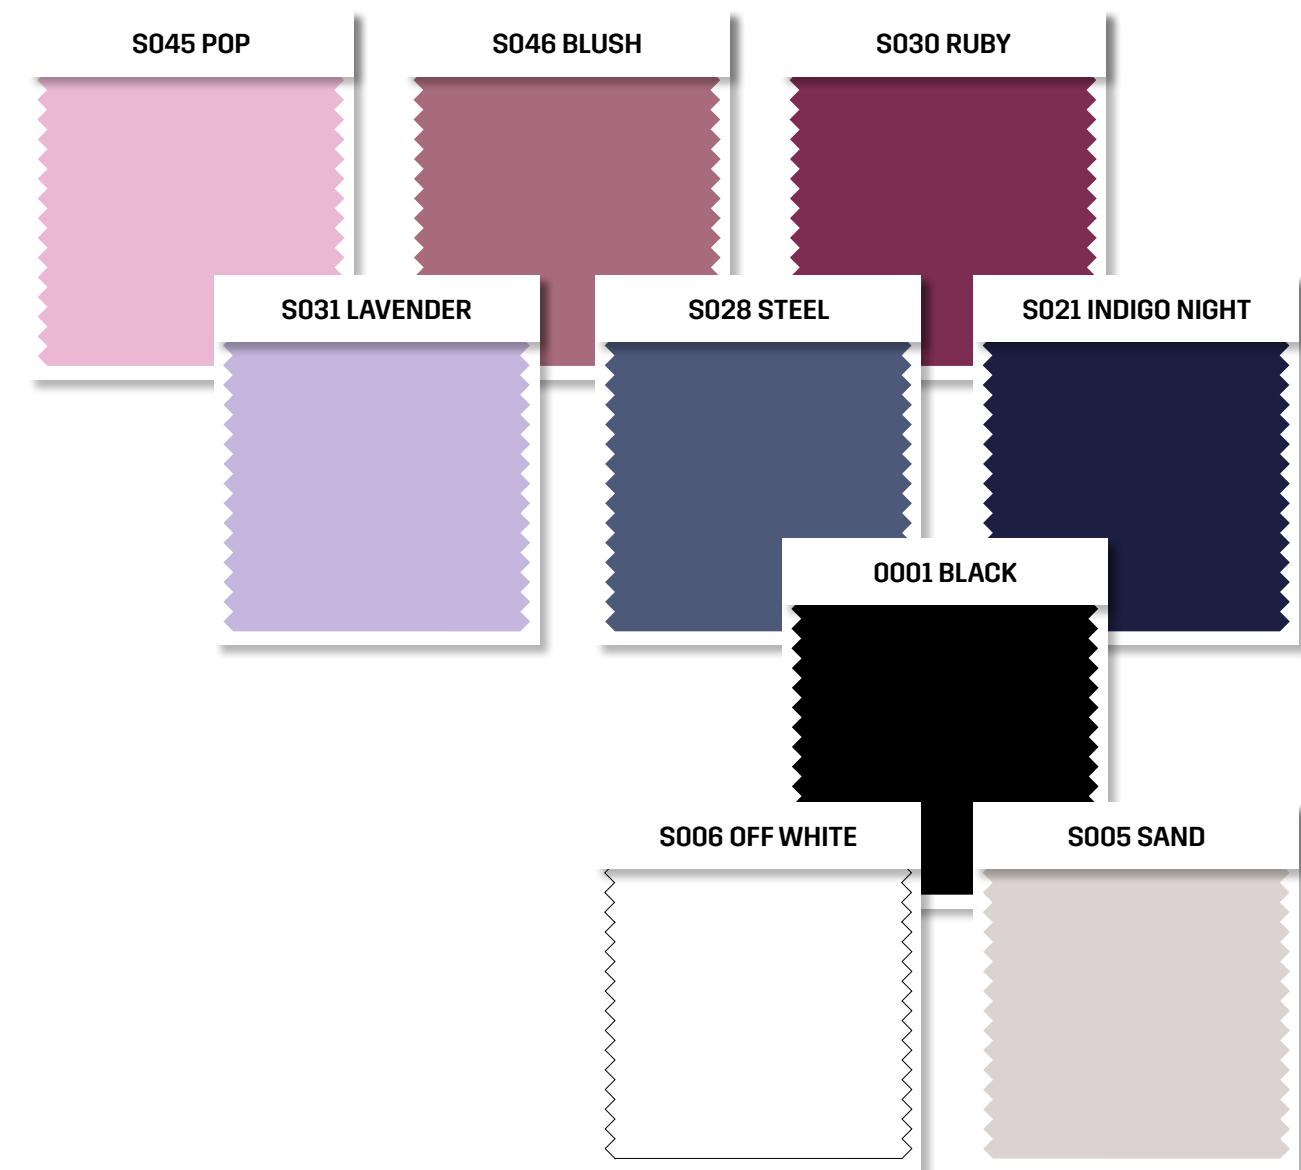

AW18 COLLECTION

The Autumn/Winter collection is designed to support a life in motion. Because we believe a body in motion is the home of a healthy and beautiful life.

The main colours of AW18 are dulled pastels, shaded by autumn. Still with a lot of colourfulness added by pink, blue and lavender.

A new colour combination for this season is navy with steel blue and lavender. A great combination which brings novelty to the classic navy blue.

The textile print of the season gave us the need for a new expression: camouflower. A graphic lily in many colourways, all with a great share of black.

GOLF

News for AW18 is a first drop with great pieces for warmer days in the beginning of the autumn or for golf travelling.

Brave the cold and continue playing golf despite the arrival of autumn! Röhnisch Collection AW18 provides you with great pieces to resist the cold, wind and rain. Our new down-filled jacket and vest FLEX are lightweight and flexible pieces, with stretch parts where you need them.

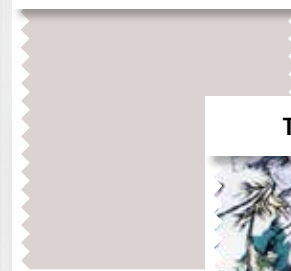

For a life in motion.

FIRST DROP

- For golf travellers
- To start the autumn
- To mix & match with all the collection

MATERIAL INFORMATION

It is Röhnisch's ambition to be a better choice for the active woman. We know that she is well informed and aware of sustainability issues and we are working very hard at being her first choice. We call our more sustainable products for BETTER CHOICE. Our BETTER CHOICE products have one or more of the following features:

BIODEGRADABLE

BETTER CHOICE

This garment has a membrane that provides it with functions to be waterproof, breathable or wind resistant. The membrane used on this garment is biodegradable which means that microorganisms in nature can break it down until it disappears and therefore gives no negative effect on nature.

We love to be out and live an active life in the city as well as in our nature. It is important to use textiles and membranes that affect the environment as little as possible.

RECYCLED MATERIAL

BETTER CHOICE

This garment is made of recycled textile fibres. We love when we get the opportunity to re-use fibres instead of making new ones. Here is an opportunity for you to choose a product made of recycled fibres, which is a better choice to hold back resource consumption.

ORGANIC COTTON

BETTER CHOICE

This garment is made of Organic cotton. Cotton is a fiber that is a renewable natural resource. We choose organic cotton that has been produced without chemicals compared to regular cotton. This makes the production better for the people who produce it and better for the environment it grows in. With no chemicals used, it improves the lives of cotton farmers. We strive to use textiles that affect the environment as little as possible.

RECYCLABLE

BETTER CHOICE

This entire garment is made of only one type of fibre, which makes it recyclable. When you are finished using it, please hand it over to a new user or leave it to us for recycling. After use, this garment can be another woman's active wear.

Together we seek to prolong life for all garments by handing them over to new users instead of throwing them away. After its life cycle, this garment is meant to be recycled to give life to a new product.

FLUOROCARBON-FREE

BETTER CHOICE

Röhnisch uses a water-repellent finish that does NOT release harmful fluoro-organic compounds into nature.

We recommend you to use a fluorocarbon-free impregnation on you garment after wash to give it a longer lifetime.

- Free of paraffin, does not stop breathability
- Do not use softeners in home laundering
- Durable up to 5 wash cycles
- Provides water repellency
- No oil repellency

TECH WARM PANTS

These pants are warming and soft with a brushed inside.

- Fluorocarbon-free
- Brushed inside
- Water resistant
- Wind resistant
- Ballmarker

FUNCTIONAL PANTS

These pants are warming and stretchy and resistant to rain and wind.

- Recyclable
- Fluorocarbon-free
- Softshell with stretch
- Windproof 10 000 ml
- Breathability 10 000 g
- Water resistant
- Ballmarker
